

Internship < Software-Defined Networking >

Description

In your thesis / internship you should investigate and answer a number of questions related to SDN:

1. Describe and compare the different technological approaches currently favored by the different vendors.
2. Investigate the potential products and services which can be developed and marketed using SDN: what impact will the technology have on the portfolio of network providers such as telecommunications and cable companies?
3. Analyze using interviews with telecommunications, cable companies, and enterprises the 'SDN adoption barriers and enabler's': what drivers and disablers help (or deter) enterprises to adopt such a new technology, and what predictions can be made about the breakthrough and adoption rate? Also elaborate on the impact of fundamental changes in technology on business processes.

Accenture will help you by providing access to subject matter experts, internal research done in this field, and contacts with our clients to conduct interviews and collect data.
