

Internship Data Scientist

About Mobiquity

We are a young, dynamic and fast growing tech company. Our experts are relevant to our customers in four cutting edge areas: Creative Design, Consulting, Technology and Analytics. We help our customers to digitally transform and enhance their company and client interaction. 20% of Fortune 1000 companies are among our clients. We care profoundly about the aptitude and attitude of all Mobsters. Therefore, we select them carefully and constantly invest in the development of our employees through our Mobiquity Academy.

About the Mobiquity Analytics team

At Mobiquity Europe we are a diverse and ambitious team of hands-on data scientists that focus on three things: development of our own data analytics products, data science consultancy services for our clients and analysis of data obtained from Mobiquity projects or customers. We work mainly with open source tools in a cloud infrastructure (AWS). We love to work with R, Python and Spark, but are always happy to try new tools and tech, so do bring your own favourite tool and show us.

Internship

During your internship you work in close collaboration with data scientists, consultants, solution architects and developers. As part of the team you have the opportunity to join the Mobiquity Academy. Through our Academy, we help you to develop personally and improve your soft skills, consulting practices, and data science skills.

The assignment

We will work together in defining a challenging assignment that suits you based on your skill level, specialties and personal interest. Support can be provided in various areas of expertise by the diverse, international and highly skilled Mobiquity analytics team. This entails support at academic level by the presence of a PhD in the analytics team.

Personal qualities

- Ambitious and talented student
- Curious and commercial attitude and interest in various business models
- A solid foundation in machine learning, data mining, natural language processing or predictive analytics
- A strong statistical background
- Knowledge of Python or R
- Strong English and Dutch communication skills

We offer a challenging learning environment. You will be working in a small team, making big impact on our clients and our own business. We offer an internship allowance of €500,- monthly, provide laptop, mobile phone, software etc. Interns are free to join the Mobiquity Academy. Would you like to meet the Mob?
