

Urticaria app integration Internship Patiënt1

November 12, 2015

Patiënt1 works on innovative solutions in the healthcare sector by developing the largest Personal Health Record system in the Netherlands. We have also developed the [huidhuis](#) and a number of other websites in Drupal 7. We are situated in Almere near the Central Station.

In 2016 we're going to develop a mobile app for urticaria patients to record information about their condition and their medication usage. The app will synchronize with the Personal Health Record for users who have an account, but it will also synchronize with an anonymized database for medical research. We're looking for an intern who will

- Gather requirements for the research database
- Implement the database
- Work with the app developers and PHR developers to integrate the research database, PHR, and mobile app

We're looking for a bachelor or master student in Computer Science with experience or interest in

- Drupal
- Java
- MongoDB or CouchDB
- mobile applications

For information or to apply, contact please send your CV and a link to your Github to Paul Boekholt, lead developer (pboekholt@patient1.nl)
